EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.54/10

Bhopal, India

Sep. 2023 – May 2027

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, WebSockets (Socket.IO), BullMQ

Databases: PostgreSQL, MongoDB, Redis

Cloud & Tools: AWS, Docker, Playwright, Git, GitHub Actions, Postman

Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems

EXPERIENCE

Software Engineer Intern

Jun. 2026 – Aug. 2026

GeekyAnts

Remote

- Engineered high-throughput RESTful micro-services and role-based authentication middleware using Node.js, Express.js, and PostgreSQL.
- Integrated bi-directional real-time communication via WebSockets (Socket.IO) and automated transactional workflows with webhook signature verification.

PROJECTS

Udaan – Scholarship Intelligence Platform | Node.js, MongoDB, Redis, BullMQ | [Live](#) | [GitHub](#)

Jun. 2026

- Implemented a rule-based engine to match student profiles with scholarship eligibility criteria and provide instant eligibility results with supporting sources.
- Architected an asynchronous job queue using BullMQ and Redis with deduplication and exponential retries to dispatch reliable deadline reminders without blocking API traffic.
- Built a Redis caching layer with query hashing, reducing database read latency by over 75% during high-concurrency searches.
- Developed an autonomous web scraping pipeline using Playwright and Cheerio with SHA-256 payload diffing to track scheme updates across government portals in real time.

TaskGenie – Service Marketplace | Node.js, Express.js, PostgreSQL | [Live](#) | [GitHub](#)

Nov. 2025

- Built a service marketplace connecting users with verified providers, with location-based service discovery, dynamic availability slots, and automated booking workflows.
- Developed a location-based provider matching using PostgreSQL GiST indexing and Haversine distance calculation, with travel-time buffers to prevent scheduling conflicts.
- Implemented resilient concurrency control using row-level locks inside atomic transactions, eliminating race conditions and double-booking collisions.
- Built a reliable Razorpay payment flow with HMAC-SHA256 verification, idempotent transactions, automated refunds, and 4-digit OTP verification for service completion.

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified Cloud Practitioner — Amazon Web Services

TCS CodeVita — Ranked in the **Top 3% globally** (Rank 10,298 / 350,000+ participants worldwide)

LEADERSHIP & ACTIVITIES

Core Technical Member

Nov. 2024 – Jul. 2025

Google Developers Group (GDG)

Bhopal, India

- Conducted 3+ hands-on web development & API architecture bootcamps, mentoring 40+ engineering undergraduates.
- Collaborated on full-stack REST API development for a women's health platform and authored a technical article on Agentic AI workflows.
