Education

VIT Bhopal University

B.Tech in Computer Science | GPA: 8.56/10

Expected May 2027

Bhopal, India

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks

Dr. Virendra Swarup Education Centre

CISCE Class XII | 91.5%

2023

Kanpur, India

Projects

Companion – AI-Powered Dementia Care Assistant | Flutter, Python, BERT | [GitHub](#)

Aug. 2025

- Architected a robust conversational state-machine using Flutter's state management and customized context-windowing to maintain persistent memory and handle multi-turn dialogue trees tailored for senior care.
- Developed a multi-lingual semantic routing pipeline via LangChain and BERT to classify user intent in real time, separating urgent task-oriented queries from open-ended emotional support interactions.
- Built a privacy-first safety and monitoring system leveraging Gemini Pro Vision, ViT, and accelerometer-based fall detection for on-device facial recognition, emergency SOS broadcasting, and GPS-synced caregiver alerts.

TaskGenie – Hyper-Local Service Marketplace | React, Node.js, PostgreSQL, Razorpay | [GitHub](#)

Jun. 2025

- Built a production-grade hyper-local marketplace with a Razorpay-integrated payment gateway supporting automated refund logic, tiered cancellation policies, and HMAC SHA256 signature verification for tamper-proof transactions.
- Engineered geolocation-based matching APIs backed by PostgreSQL B-Tree Indexes and ENUM-typed columns, improving query efficiency and scalability under concurrent load.
- Architected a Digital Handshake & Identity system combining Google OAuth 2.0 and 4-digit OTP verification to secure user sessions, validate service completion, and trigger automated provider payouts with reliability scoring.

CineBuzz – Movie Discovery & Recommendation Engine | React, REST APIs, Postman | [GitHub](#)

Jan. 2025

- Constructed a dynamic movie discovery platform indexing **10,000+ titles** with advanced search, genre-based browsing, and trending dashboards, enhancing user navigation and frontend responsiveness through strategic UI optimization.
- Designed a content-based filtering algorithm that analyses metadata and watch history to generate personalized recommendation lists, improving content relevance for returning users.
- Implemented client-side caching to eliminate redundant API calls and validated all integrations via Postman, resulting in a measurably faster and more reliable user experience.

Technical Skills

Languages: JavaScript, Java, Python, C++, SQL

Front-End: React.js, Redux, Next.js, Flutter, HTML5, CSS3

Back-End: Node.js, Express.js, Flask, Firebase

Databases: PostgreSQL, MongoDB

AI / GenAI / ML: LangChain, LangGraph, BERT, ViT, Hugging Face

Cloud & DevOps: AWS, Docker, GitHub Actions (CI/CD), Vercel

Tools & Platforms: Git, GitHub, Postman

Leadership & Activities

Google Developers Club – VIT Bhopal

Dec. 2024 – July 2025

Core Member | Web Development Team

Bhopal, India

- Led a hands-on Web Development & AI/ML workshop for **50+ students**, designing a comprehensive curriculum on foundational and modern tech stacks.
- Engineered scalable RESTful APIs for the club's flagship women's wellness platform, optimizing data flow and improving backend reliability.
- Authored a technical article on *Agentic AI* for GDG VIT Bhopal's Medium publication, driving community engagement and domain awareness.

Certifications

AWS Certified Cloud Practitioner – Amazon Web Services

The Bits and Bytes of Computer Networking – Google (Coursera)

Introduction to Machine Learning – NPTEL

Data Analytics and Visualization – Accenture North America Virtual Experience Program
